

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) An expandable absorbent material without cellulosic fibers, comprising
consisting essentially of superabsorbent in an amount from about 1 to about 75 weight percent, and
crimped thermoplastic fibers in an amount from about 25 to about 99 weight percent, and optionally
binder and/or surfactant, where said material has a density of from about 0.02 g/cc to about 0.25
g/cc.
2. (Original) The material of claim 1 wherein said thermoplastic fibers are conjugate fibers.
3. (Original) The material of claim 1 wherein said thermoplastic fibers are elastic fibers.
4. (Original) The material of claim 2 wherein said conjugate fibers are comprised of polyolefin.
5. (Original) The material of claim 2 wherein said conjugate fibers are comprised of polyolefin and
superabsorbent in a side-by-side configuration.
6. (Original) The material of claim 2 wherein said conjugate fibers are comprised of polyolefin and
poly (vinyl alcohol) in a side-by-side configuration.
7. (Original) The material of claim 1 further comprising a binder
8. (Original) The material of claim 7 wherein said binder is a liquid.
9. (Original) The material of claim 1 wherein said thermoplastic fibers are mechanically crimped.
10. (Original) The material of claim 1 wherein said material has an electret charge.
11. (Previously Presented) The material of claim 1, wherein said material is expandable by at least
about 50 percent upon wetting.
12. (Original) A personal care product selected from the group consisting of diapers, training pants,
feminine hygiene products, absorbent underpants and adult incontinence products comprising the
material of claim 1.
13. (Original) The product of claim 12 wherein said personal care product is an adult incontinence
product.

14. (Original) The product of claim 12 wherein said personal care product is a feminine hygiene product.
15. (Original) The product of claim 12 wherein said personal care product is a diaper.
16. (Currently Amended) A surge material for personal care products comprising an expandable absorbent material without the use of cellulosic fibers, comprising said surge material consisting essentially of superabsorbent particles in an amount from about 20 to about 60 weight percent, and crimped conjugate thermoplastic fibers in an amount from about 40 to about 80 weight percent, and optionally binder and/or surfactant, where said material has a density of from about 0.02 g/cc to about 0.15 g/cc.
- 31 17. (Original) The surge material of claim 16 having superabsorbent particles in an amount from about 30 to about 50 weight percent.
18. (Original) The material of claim 17 wherein said conjugate fibers are comprised of polyolefin.
19. (Currently Amended) A retention material for personal care products comprising an expandable absorbent material without the use of cellulosic fibers, comprising said retention material consisting essentially of superabsorbent particles in an amount from about ~~[[25]]~~ 50 to about 75 weight percent, and crimped conjugate thermoplastic fibers in an amount from about 25 to about 50 weight percent, and optionally binder and/or surfactant, where said material has a density of from about 0.05 g/cc to about 0.25 g/cc.
20. (Original) The material of claim 19 wherein said conjugate fibers are comprised of polyolefin.
-
